Capital Cities Quiz
HTML/CSS/JS - Recap

The following exercise contains the following subjects:

- Everything we have learned

Instructions

Create an interactive quiz that tests the user's knowledge about the capitals of various countries
Here is a small demo

Setup
- **Styling**
  - Use contrasting colors for correct and incorrect answers.
  - Implement intuitive hover effects on answer options and buttons.

- **JavaScript Logic**
  - Implement a function to display the current question and associated answer options.
  - Add event listeners to options to handle correct and incorrect answers.
  - Maintain a score counter to track the user's performance.
  - Develop a function to proceed to the next question or end the quiz.
  - Add Reset Button (no page refresh)

- **Extra:**
  - Introduce a timer to add a challenge to the quiz.
  - Implement randomized question order on each quiz attempt.
  - After selecting an answer make it go to next question automatically
